

*Unique Security Solutions... The
Final Layer of Security for Your
Business*

Facts about lost or stolen sensitive information

- Your name, date of birth and social security number are worth from \$50 to \$80 on the street to an identity thief.
- A mortgage file is worth \$300 or more depending on the credit.
- Armed with the amount of information in a mortgage file, an identity thief can wreak havoc on someone.

How it's Done

- Thieves reach out to a “collector” who gets paid a per piece rate for victims information.
- Volume remains low to avoid detection.
- This makes a great part time job for an errant employee at \$300+ for the information in a mortgage loan file.

Over 400 million records have been lost or stolen in just the last few years.
